

ORDER FOOD ONLINE

See why mobo2go is the ultimate food ordering system

Mobo2go Partner details:

RESTAURANT & TAKEAWAY ORDERING
add a new sales channel to your business

What is Mobo2Go?

Mobo2go is an online & mobile ordering system designed specifically for food to go retailers.

We provide you with your own web & mobile ordering sites that are branded to match your existing web site.

Mobo2go enables food to go retailers to offer a pre-order/ pay "grab & go" service which improves customer service and boosts sales.

Who is it for?

The system has been designed for multi-site food to go chains and independents:

- Restaurants
- Café & coffee shops
- Fast food
- Campus
- Sandwich shops
- Catering companies
- Lunch time food delivery

How does it work?

1. Customers place orders using their PC, tablet or smartphone.
2. Customers pay online – direct to your account.
3. Orders are printed in-store, for pickup or delivery.
4. Customers "grab & go" or orders are delivered.

Markets

Restaurants

Customers and staff can find telephone ordering frustrating. Provide your customers with the ultimate in convenience ordering and see the results.

Sandwich Shops

Ideal for sandwich shops that allow customers to create their own sandwiches.

Company Catering

Enhance your in-house catering operations and keep your hungry staff on-site.

Cafe & Coffee Shop

Maximise your lunch time trade by offering a convenient “grab & go” service for the time conscious workers.

Take Away

Experience has shown that customers who order online and pay with a credit card spend more.

University Campus

Provide your students and staff with an online food court - ideal for helping minimise queues at peak times.

Fast Food

Mobo2go enables you to provide a fast and efficient service for both in-store pickup and home delivery.

Van Delivery Round

Provide a restricted lunch time delivery service to specific companies and departments.

Contract Catering

Provide your clients with an innovative catering solution that will help keep employees on site.

Features

Web Integration

Simply add a button to your existing website, App or intranet to launch mobo2go. We do the rest for you.

Your Brand

The system is branded to match in with your existing website.

Mobile Ordering/App

A mobile version of mobo2go enables your customers to order from a tablet or smartphone.

Guest Ordering

Provides quick and simple ordering for customers who wish to try the service.

Member Ordering

Customers can sign up as members and take advantage of additional functionality.

Order Printing / EPOS

Orders are printed on an in-store POS printer, or can be sent direct to the in-store EPOS system.

Reporting

Sales and customer reports are available for export to Excel.

Pickup Orders

Provides the functionality to offer a “grab & go” service.

Delivery Orders

The smart way to provide an efficient delivery service.

Payment Options

All payments are made direct to your accounts so that you are in control.

Production Scheduling

Orders are sent to the store according to production rules that have been pre defined.

e-Receipts

Customers receive a confirmation e-mail with details of the items ordered.

Management Console

View details for orders sent to store and orders waiting to be sent to store.

Discount Voucher System

Generate discount voucher codes to incentivise customers and drive sales.
